'Gapless' Collection V2.2

Updated for beta 11.

A collection of simple 'gapless' indicators to get you started with your own versions.

'Gapless' is simply this: it ignores the intra-day session gap. Why do this? Ever tried trend trading at the session open but having to wait for your EMA or RSI to catch up? As far as I'm concerned if I am not making money from the gap itself ie. holding a position overnight, then I want an indicator that will show me 'relative' direction from the opening bar.

- * Useful for stocks, DAX, grains and those trading the RTH sessions. You could plot a ETH chart with a regular indicator next to a RTH chart with the gapless indicator for confirmation.
- * The indicators have the 'option' to use the gapless concept, else they plot as usual.
- * EOD type charts will plot as normal, it will automatically use the standard code.

Includes:

- * Gapless EMA (Thanks to FatTails for this original NT7 code).
- * Gapless SMA

V2 Added:

- * ADX
- * Stochastics
- * Double stochastics
- * Natural Moving Average x 2

V2.2:

- * Checked for NT8b9. Cleaned naming.

and also includes a 'gapless price proxy'. Use this as a replacement 'Input' for your panel indicators. It works for **some** but not for others, so there are **limitations**. Try on a regular Macd. Simply add the regular Macd indicator and select 'Input Series' > Indicators>Sim22_GaplessInputProxy. It will now ignore the gaps.

MacdBB + gradient + gapless + audio V1

Updated for NT8 beta 11

Includes:

- * Paint bars
- * Candle outlines
- * Paint background of panel and chart
- * Conservative mode
- * Gradient option, including 2 gradient add-on functions for your other indicators
- * Custom audio alert
- * Gapless option. Use intraday to ignore the opening gap. Useful for determining the opening trend.

Make sure you extract the .zip file first to show the files. Inside you will find the .zip to import!

thanks for the effort you put in. q: is it hard to add flexible MA's like EMA, SMA, etc. t

o the periods?

Make sure you insert the audio files here: C:\Program Files (x86)\NinjaTrader 8\sounds

April 14th, 2018 08:15 PM **optionsnh** ★★★★★
thank for the time you put in on the development of this indicator

August 31st, 2017 04:05 PM **Buscador** ★★★★★
Thanks for your contribution. Your indicator sharing is great.

August 28th, 2017 01:59 PM **tuffcoucou** ★★★★★
Hi Thank you for the indicator work good the only thing, it does not stay on the chart I ha

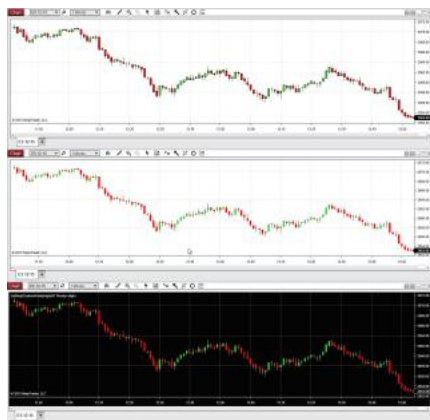

ve to put it back all the time.

But I am very please with it. 🤖

You can have Doji with your unoutlined NT 8 candles

Download

Name: **DrawCandleClose** Version 1

This indicator was created to show the Closing price when the CandleStick Opening and Closing price were the same and a Transparent Body Outline color was specified. Standard NT 8 CandleStick Closing price is drawn with the Outline color and is Transparent when that color is Transparent.

Note that NT7 had logic to draw a Black Close line, if the Outline color was Transparent and the Background color was White. This logic has been removed in NT8, so the problem appears in NT8 regardless of Background color.

NT8 DrawCandleClose Indicator is obsolete. Use fix described below. Attached file is a dummy file to meet posting requirements. Please download the file to log your interest in this fix, but do not install downloaded file. Instead, apply the fix manually. Never blindly replace standard files because of the risk of back leveling.

If you would like to have this fix standard NT8 CandleStick behavior, then post your vote for Tracking ID # SFT-818 to thread
<http://ninjatrade.com/support/forum/showthread.php?t=79416>

NT 7 Version fix available at
https://futures.io/local_links.php?catid=27&linkid=1667

Examples

Top CandleStick: Chart Style = Candlestick with Black outline.

Middle CandleStick: Chart Style = CandleStick Transparent Outline After Fix

Bottom CandleStick on Black Background After Fix: Chart Style = CandleStick After Fix

NT8 Fix for Tracking ID # SFT-818, Missing Doji when CandleStick Outline Transparent:

Description: Always draw the Doji Close line with the Wick Color instead of the Outline Color. This eliminates the inefficiency of having an Indicator check every CandleStick bar close for Open==Close and overwrite the already drawn Transparent Close line.

Applying this fix in no way changes the appearance of CandleSticks that have bodies. This can be verified with the examples provided.

NT8: Lines 63-64 \Documents\NinjaTrader 8\bin\Custom\ChartStyles\@CandleStyle.cs
Replace:

Code

```
TransformBrush(overriddenOutlineBrush ?? Stroke.BrushDX, new RectangleF(point0.X, point0.Y - Stroke.Width, barWidth, Stroke.Width), Stroke.BrushDX, Stroke.Width, Stroke.StrokeStyle);
RenderTarget.DrawLine(point0, point1, overriddenOutlineBrush ?? Stroke.BrushDX, Stroke.Width, Stroke.StrokeStyle);
```

With:

Code

```
TransformBrush(overriddenBarBrush ?? Stroke2.BrushDX, new RectangleF(point0.X, point0.Y - Stroke2.Width, barWidth, Stroke2.Width), Stroke2.BrushDX, Stroke2.Width, Stroke2.StrokeStyle);
RenderTarget.DrawLine(point0, point1, overriddenBarBrush ?? Stroke2.BrushDX, Stroke2.Width, Stroke2.StrokeStyle);
```

I recommend the following to apply the fix. It may seem complicated but will save you time in the long run. Note that it is undocumented but NT Backup never includes files that begin with the character "@".

- 1) Copy \Documents\NinjaTrader 8\bin\Custom\ChartStyles\@CandleStyle.cs
- 2) Paste the file and rename it @CandleStyle.cs Before SFT-818
- 3) Edit @CandleStyle.cs with Notepad
- 4) Make changes to lines 63 & 64 with Notepad and save changes
- 5) Compile any file with NT Editor and Exit NT Editor. New @CandleStyle.cs will be used in the compile.
- 6) From next start of NinjaTrader, CandleSticks will use Wick Color for Doji Close line.
- 7) Copy \Documents\NinjaTrader 8\bin\Custom\ChartStyles\@CandleStyle.cs
- 8) Paste the file and rename it @CandleStyle.cs After SFT-818

Any NT updates will replace @CandleStyle.cs so you will have to make the changes again. Create Before and After copies of the update, as you did above, adding the update number after 818. Never blindly replace standard files because of the risk of back leveling. You can use Winmerge to compare updated @CandleStyle.cs and @CandleStyle.cs After SFT-818 and reapply fix to updated.

Cleanup:

- 1) Delete Indicator DrawCandleClose.cs, if it exists, from \Documents\NinjaTrader 8\bin\Custom\Indicators.
 - 2) Start NT Editor > Right click on blank form and select Compile to remove DrawCandleClose Indicator.
- NT will automatically remove the Indicator from any Charts that use it.

Test:

Create a CandleStick chart with Transparent outline. Verify that you see Doji.

If you installed Chart Style Doji then:

- 1) Change Charts that use it to use CandleStick instead.
- 2) Delete ChartStyleDoji, if it exists, from \Documents\NinjaTrader 8\bin\Custom\ChartStyles.
- 3) Start NT Editor > right click on blank form and select Compile.

Linear Gradient MultiOscillator with bar, outline and bg colors (V1.2)

Download

New V1.2 VERY IMPORTANT FIX

Includes:

- * 6 levels of gradient stops, so you can set your gradient coloring to anything you want.
- * 2 new functions in the 'Addons' folder that you can use in your own indicators to help make linear gradients easy.
- * Simple toggle to reverse coloring without having to enter all new brushes again.
- * RSI, CCI, Stochastics and Double Stochastics.

Update: Dec 2015

* Added ability to not plot the indicator in the lower panel, just paintbars or background. Make sure you place the indicator in the 1st panel. The plots/price marker should automatically become transparent.

Update: Jan 2016

- * **VERY IMPORTANT FIX.** Made gradient "Get Color" more efficient. Was making new LG every bar. Now it instantiates once.
- * Added Stochastics and Double Stochastics.
- * Added an average line if required.
