★★★★★

Emini Watch Better Rotation for Forex NT8.0.2

Barry has not provided an NT8 version yet on his [website](#) so here it is.

See the image for options.

Note: Tested with EOD data but should work intra-day if you have a real-time feed for forex.

Choppiness Index Optimized NT8.0.2 Updated

Update 1.2 Dec 2016: Minor fix with Upper and Lower levels reversed.

There is a copy of this indicator at the NT8 forums but I went to town with optimizing it.

See this [link](#) for how to use it.

I appreciate your work and sharing. Thanks!

[TSSuperTrend](#)
[Download](#)

★★★★★

This is just the TSSuperTrend in the NT7 section converted to NT8. It was compiled in NT8.0.2.0. It is possible in this version to choose different plot colors, also to switch the plot, arrows, bar coloring and alert sounds on and off independent of each other. I have incorporated the code for adaptive mode in this version rather than have the separate homodyne discriminator. Please let me know of any problems.

March 10th, 2017 09:03 AM **NGtrader** ★★
The coding in this indicator causes memory leak issues when I use it. I take it off my ch

arts and my memory use for Ninjatrade returns to normal instead of going up to 2 gb.

February 9th, 2017 09:32 AM **teresa** ★★★★★
great - thanks a lot!

[More...](#)
[ToggleTrades](#)
[Download](#)

★★★★★

Dec 19th 2016 Version 1.1
fixed a minor bug (error on close of chart showing up in log)
added icon for the button: thanks to mk77ch for providing the code and the icon.

the attached icon toggle.png must be copied to the Ninjatrade 8 Folder (usually .../Documents/NinjaTrader 8)
If the icon is found it will be used if not we will fallback to TextMode in the menubar.

INSTALLATION: Please unzip the zip first. It contains the toggle.png and the Ninjatrade archive for import.

Dec 16th 2016 Version 1
This Indicator adds a button to the ChartMenuBar which allows to quickly show/hide trade executions on the chart.

I took the idea from NT7 Indicator created by Whitelight on FIO and build for NT8.
This is version 1.0.

Installation is done via the normal Tools -> Import -> NinjaScript AddOn Function.

Works only on NT8; Tested / Created on NT 8.0.2.0

Thank you Michael. These 'little' things are rather big in my books.

December 20th, 2016 09:17 AM **mk77ch** ★★★★★
great indicator, thank you!

December 17th, 2016 07:54 PM **Aregon** ★★★★★
Many thanks !!

[jWilliams2 - Williams %R Smoothed](#)
[Download](#)

★★★★★

This is the Williams %R indicator with JayMA smoothing. Williams %R is a momentum indicator designed to identify overbought and oversold areas. By adding JayMA smoothing, we have a quick yet smooth version of this popular indicator.

Originally added by BigMike, I've converted it to NT8.

Hello JayMA is not responding to changing any parameters, phase nor period.

Is there somebody who can have a look on it where is problem?

JayMA

Download

NT7 version.

Just the JayMA indicator, converted from NT7. Should behave like it's

 Nice first try.

-- Use LLMA by Aslan instead. --

Same indicator, but better code.

Heikin-Ashi Smoothed and Delta NT8.0.2 V1.1 Update

Download

**Heikin-Ashi Smoothed and Delta NT8.0.2 V1.1**

Update V1.1 Dec 16: Forgot to add Try-Catch statements. You should download this version for 'safety' reasons. Also fixed bug whilst using in the market analyzer.

This is a port of FatTails NT7 indicator, with some additions of my own.

You will find:

1. both [Dan Valcu's](#) and [Sylvain Vervoort's](#) smoothed and original versions.
2. 32 kinds of smoothers, 6 of which are 'gapless'. (Thanks to Rayko for uploading all the 'au' smoothers) at the NT forums. (This includes a [gapless Jurik MA that works on TickReplay](#)).
3. Heikin-Ashi delta as well (It plots in ticks rather than points) . Just select 'Delta' and set to another panel besides your instrument one.
4. Hide the chart bars or paint them.
5. Hide the wicks.
6. Most will work on TickReplay.

 Thank you for all the great indicators.

 April 10th, 2019 03:53 PM **nicole**
 I would like to second the comment from roblogic. The indicator looks awesome but when I g

o to import it, it is giving me an error saying:

 February 21st, 2018 12:19 PM **topdogtony**
 great thanks trying it out now.....

 February 8th, 2018 12:31 PM **roblogic**
 I'd love to use that but I can not import it in NT8. When importing it says that the PC ha

 s newer files that those that are being imported...
 EMA, SMA for many indicators. Either i

f I accept or decline all at the end comes a message saying<gt;
