📁 **BVA Version 2**   [⬇ Download]   ★★★★★

BVA Version 2 (Bar Volume Accumulation), is for spotting Divergences in Volume and Price Action.

Example:
Higher High with less BVA, upward trend is loosing momentum.
Lower Low with less BVA, downward trend is loosing momentum.

Version 2 has current and historical values included for use in back testing and strategies. The rest of the code is the same as Version 1 that's posted in the Elite Download Section.

Note:
The plot values for testing have been set to transparent. If you want to see them on your chart, you must select a color for each plot.

Compiled using NT 8.0.12.0 64-bit (Multi-Broker)

📦 **Market Replay CL 03-18 (NT8)**   [⬇ Download]   ★★★★★

NT 8 Market Replay data for CL

Contract: CL 03-18

Download instructions:

dowload and unzip file in NT 8 replay folder
Documents\NinjaTrader 8\db\replay
The file will create a folder with the relevant front month and a series of .nrd files inside (one per day)

Make sure to use the "extract here" function as shown, and not the "Extract to" function, to avoid the creation

of a folder within a folder.

**Multi Reverse EMA (REMA)** [⬇ Download] ⭐⭐⭐⭐⭐

**Exported with 8.0.12.0 64-bit**

Minor Update -- Remove Print statement as noted by bobc635, thanks 2/2/2018

This is the NT8 version of NT7 MultiREMA which is described in full in the NT7 section here. There are no additional features or enhancements.

The indicator will be installed in a folder "Cheech". The REMA indicator will be installed in the Indicator folder.

**Note:** The default alpha setting for the Trend Plot is set to 0.1 to match the REMA setting as supplied by Ninjatrader. The default setting for the NT7 version for the same plot is 0.05 as was indicated in the article. Adjust accordingly.

Thank you, day of the week is very important on my trading.

June 27th, 2018 12:03 PM **1973Hog** ⭐⭐⭐⭐⭐
Would really find this indicator useful when going back in time on the charts. However, I

get the following Error Message when attempting to import it. Yes, I have renamed the file

as suggested, but still no luck. Any help would be most gratefully appreciated.

May 20th, 2018 02:21 PM **bobc635**    ⭐⭐⭐⭐
Thanks... I did not realize how handy this is....

[📄] **Advanced Risk Reward Indicator Download Entry By bassam posted by NinjaTrader_Jim on Ninja Trader Support Forum**   [⬇ Download]   _ ⭐⭐⭐⭐⭐

Exported using NT 8.0.9.0

Description
This is a port of the NinjaTrader 7 AdvancedRiskReward.v3 indicator by bassam. The original indicator can be found here.

Quote:
This indicator helps you define your entry, stop and target (1 or 3) visually on the chart with the help of horizontal lines, calculates your potential P/L ,unrealized P/L,Risk/Reward ratio and contracts sizing per account size.

Once started click on the chart 3 times there where you think your values will be appropriate , then shift the lines as needed and save the changes.

⭐

March 12th, 2018 06:34 PM **mlamberttv** ⭐⭐⭐⭐⭐
Thank you for this helpful indicator. I use it now everyday.

- Defines your Risk/Reward ratio using 1 or 3 targets
- Save & reload your values,be it minute,daily or weekly chart (One set of values per instrument)
- Interactive Mode: per-tick P/L based on the chosen contracts size
- Interactive Mode-Attached: per tick potential P/L
- Non-Interactive : Contract sizing is based on the defined risk per account size
- Hide/show the indicator as required & show/hide on start-up
- Extended or short lines
To Import
1. Download the attached file to your desktop
2. From the Control Center window select the menu Tools > Import > NinjaScript Add On.

[📄] **mahToolBar By Aligator**   [⬇ Download]   _ ⭐⭐⭐⭐⭐

"Indicator by : Aligator
/// Revision 0 - April 4, 2017
/// Revised April 16, 2017 by Woody Fox too include all Drawing Tools and Chart Markers
/*
The mahToolBar indicator installs drawing object icons in the NinjaTrader Main Toolbar
for a one-click drawing.

This is a compilation of ideas and scripts from several people on this froum Including ChelseaB, Jessie, shuglu, and AlanP - Thank you all.

The toolbar is a selection of draw objects placed in the chart main tool bar to save chart space. Other available toolbar shortcut indicators around all plot inside the main chart area, and that seems to be a waste of the chart area.

I have included my favorites and the most frequently used draw objects by chart analysts. One can certainly add, with minimal effort, as many objects from the draw object dictionary as one wishes.

Individual draw objects can be selected and the user can choose any or all objects to include in the toolbar. Two icons (or objects) are very handy for changing the width of the bars by simply clicking on the icons.

The script can use some cleaning for more efficiency. Until someone comes up with a prettier and more efficient toolbar this one works great for me all day drawing lines, channels, fibs, etc.

Exported: NinjaTrader 8.0.5.2"
