Round Numbers V2   [⬇ Download]   ★★★★

This code allows lines to be drawn at regular price levels. I had this converted professionally from a NT7 indicator so I <u>cannot</u> assist with support.
The lines are customisable with the usual line options as well as the line length.
I hope someone else finds it helpful.

🙂

May 22nd, 2017 02:26 PM **dragutin** ★
not working for me.

May 12th, 2017 12:22 PM **moerfutures** ★★★★★
very helpful, esp with new alert and trade features with NT8 🙂 DOUBLE 5 STAR !!

More...

'NoGaps' ChartStyle - eliminate intraday candle gaps   [⬇ Download]   ★★★★★

This chart style is identical to the standard NinjaTrader candlestick style except that it uses the previous candle's closing value for the current candle's open value (except when the current bar is the first bar of a session). This eliminates single tick gaps between intraday bars when the last price changes on the first tick of a new bar. As a result, charts appear smoother and are easier to read and interpret, without any price data truly being modified. See attached example of ES.

Exported using NT Version 8.0.6.1 64-bit (Standard)

edit: The file has been updated to display doji bodies in the same color as the wick (NT default behavior is to display dojis with the candle *outline* color, but this becomes a problem when you try to display candles with no outline.)

Awesome thanks

HIGH VOLUME ALERT   [⬇ Download]   ★★★★

A simple indicator that shows the high volume. You can change the volume alert depending the time frame used.
Converted from NT7. I found this indicator useful in this forum some
years ago. I use it in time frames of one and five minutes.

October 4th, 2017 01:55 PM **snowpatrol** ⭐⭐⭐⭐
Nice indicator. A volume feature would make it really amazing. Still, love the vertical

bars highlighting the surge in volume.

May 15th, 2017 09:20 AM **PierreG** ⭐⭐⭐⭐
Thx. Very useful 🙂

May 13th, 2017 09:32 PM **bobc635** ⭐⭐⭐⭐⭐
A nice additions.....Thx

📘 **MACD Color and Stochastic Color**   ⬇ **Download**   ⭐⭐⭐⭐⭐

This is an NT8 conversion of my MACDColor and Stochastic Color indicators. Both have user definable OB/OS levels, and alert capability.

📦 **Market Replay CL 05-17 (NT8)**   ⬇ **Download**   ⭐⭐⭐⭐⭐

NT 8 Market Replay data for CL

Contract: CL 05-17

Download instructions:

dowload and unzip file in NT 8 replay folder
Documents\NinjaTrader 8\db\replay
The file will create a folder with the relevant front month and a series of .nrd files inside (one per day)

Make sure to use the "extract here" function as shown, and not the "Extract to" function, to avoid the creation of a folder within a folder.

July 26th, 2017 08:23 PM **dstrader** ⭐⭐
Thanks, but not sure the 'indicator folder' is a good location for these. We should move t

hese to some other place. It will become a real mess if we start to upload replay data in

the indicator area.

Make sure to use the "extract here" function as shown, and not the "Extract to" function, to avoid the creation of a folder within a folder.

Note: this is Market Replay data for NinjaTrader 8. The format is different from NT7.

Also note, these downloads are likely not to include Sundays data.

The format I used for this first file is .zip, but for all the subsequent files it's .7z which offers a better compression.
